Jukebox

Your guests pick the music.

Host a session from your Apple Music or Spotify library, share a code, and let everyone vote on what plays next. The most popular songs rise to the top — it's democratic party music.

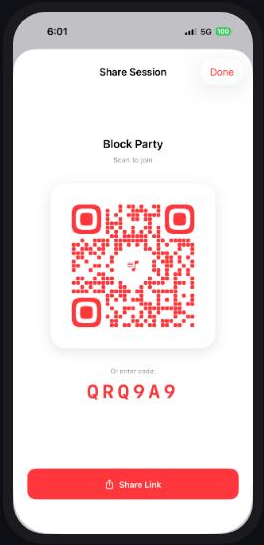
Apple Music Spotify

How It Works

1

Host a Session

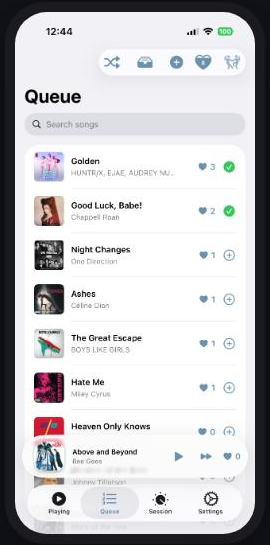
Pick any playlist from your Apple Music or Spotify library. Jukebox generates a unique code your guests can use to join. Share it as a QR code, link, or just tell them the number.



2

Guests Vote

Everyone gets votes to spend on songs they want to hear. The more votes a song gets, the higher it climbs in the queue. When a song plays, votes are returned — so keep voting!



3

The Best Songs Win

No more arguments about what to play next. The crowd decides. Songs with the most votes automatically play first.

Features

Real-Time Voting

The crowd picks what plays next. Votes update instantly across all devices.

Song Requests

Guests can search the full catalog and request songs. Hosts approve or auto-approve. Built-in explicit content filtering keeps it clean when needed.

Democratic Skip

Let guests vote to skip a song. If enough people agree, it moves on.

CarPlay & Android Auto

Full CarPlay and Android Auto integration makes Jukebox perfect for road trips.

Time-Synced Lyrics

Beautiful lyric display with swipe-to-seek. Every word, perfectly timed.

AirPlay Support

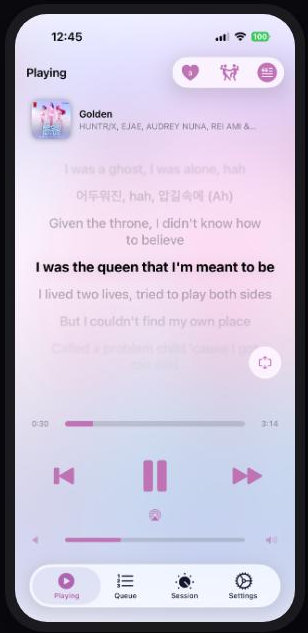
Stream to any AirPlay speaker or TV. Fill the room with the party's choices.

Explicit Content Filter

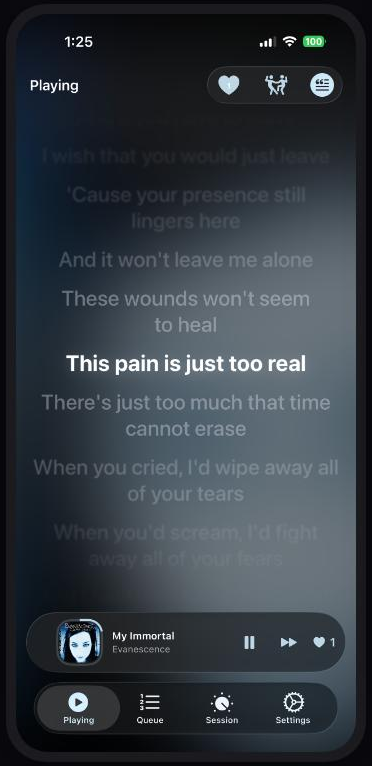
Toggle explicit song filtering on or off. Keep the playlist family-friendly for any venue.

Every Word, Perfectly Timed

Time-synced lyrics scroll in real time as the song plays. Swipe through lyrics to seek to any part of the song. Works with Apple Music and Spotify.



Multilingual lyrics support



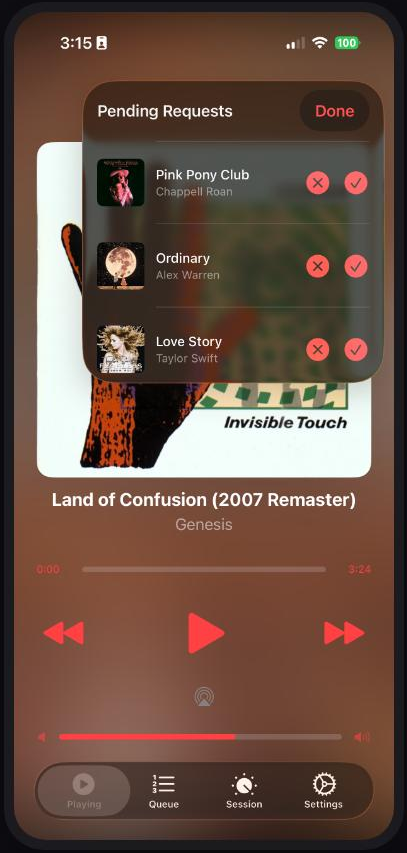
Swipe to seek through lyrics

Adaptive color theming

Song Requests

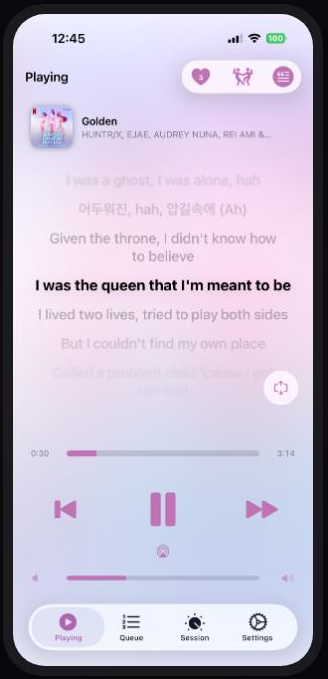
Guests can search the full Apple Music or Spotify catalog and request songs to add to the queue. Hosts approve or auto-approve requests with a tap.

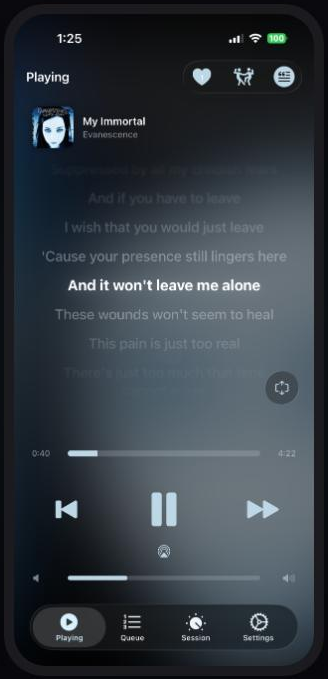
- Search millions of songs
- Host approval or auto-approve
- Explicit content filtering
- Duplicate request prevention



Colors That Move With the Music

The app adapts its entire color scheme to match the album artwork. Every song feels like a new experience.



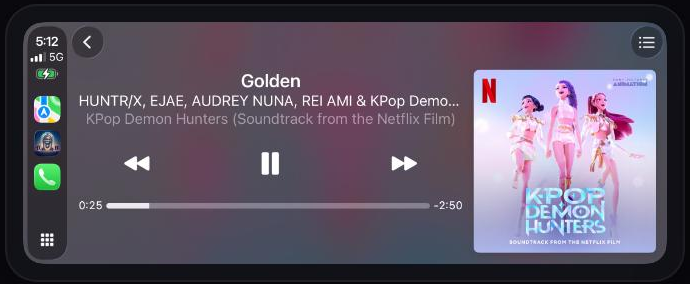


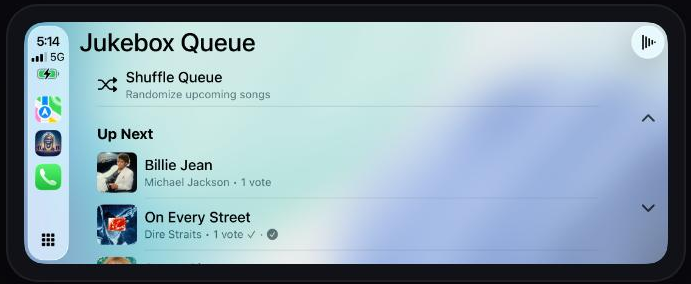
Dark mode by default. 11 preset color options.

CarPlay Android Auto

On the Road

Full CarPlay integration. Control the queue and see what's playing, all from your car's display.

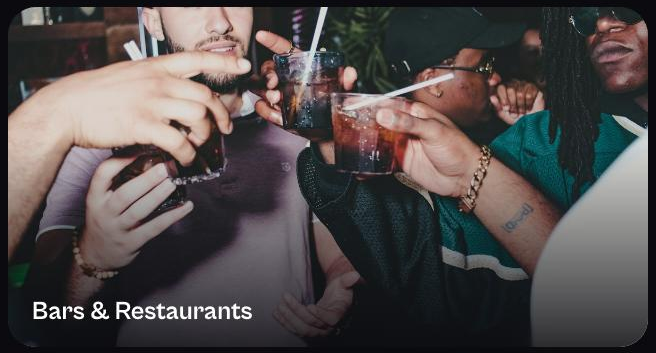




Perfect For

House Parties

Weddings & Events



Bars & Restaurants
